

PANGAEA EXPLORATION

exploration - education - conservation

About Us.

Our Mission

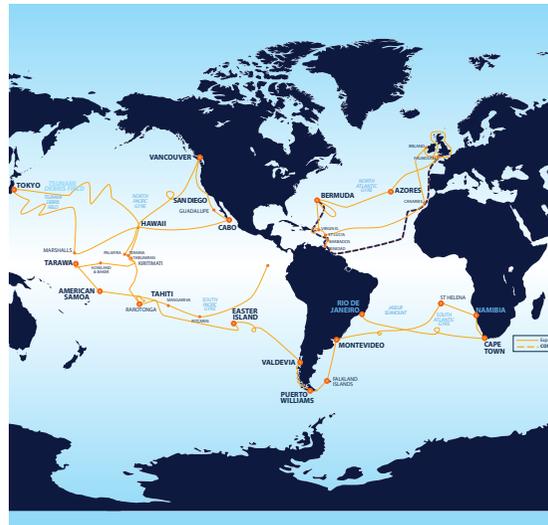

Pangaea Exploration believe that the depth, complexity and sheer inertia of the threats to our oceans is significant. Practical solutions and the resources to implement them do still exist. The central challenge is our collective will to act, to care. We also believe that our ultimate success depends on a future generation of inspired conservationists.

In Three Parts;

To actively strengthen the health of marine life through Exploration, Conservation and Educational work

To inspire and develop a new generation of leaders in conservation, science, communication, education, art and policy leadership

To provide information and enjoyable ocean sailing expeditions to guest crew

What We Do

In a nutshell;

Our support of marine exploration, education and conservation work is specifically designed to create space for everyone to join the front line team. This is true all over the world's oceans from the Sargasso sea looking for plastics to a transit of the Southern oceans. We have something for everyone.

On our expedition vessel Sea Dragon, professional leaders work alongside visiting crew as one team. A synergy that provides valuable manpower, skills and financial support to our broader mission.

We give you the chance to step forward and experience front line issues first hand, build skills and live a genuine adventure.

We are involved in high sea research, coastal conservation, educational, filming and many other activities. We work in partnership with international and local organisations.

Our Trips;

We exist to provide uniquely capable, efficient and highly tailored support to formal scientific, educational and conservation expeditions. As well as exceptional sailing voyages across oceans, on high seas adventures and occasional crewed private charter

Become a Mission Leader

We are always looking for inspiring multidisciplinary people to lead a trip in a way that enables learning and working together to find solutions to the diverse facets that challenge the conservation of our waters.

If you can deliver this and empower people toward inspiration, innovation and change, then join us. Bring the proficiency you have gained in your specialised field and become part of something great, something bigger.

We Need From You

Clear and understandable vision of your mission

The ability to work with our skippers and first mates to pull together an itinerary

The ability to pull together an expedition profile - summary of the trip and information on yourself

Work out costs for the trip

The ability to encourage people to imagine your vision but also excite them enough to join you.

The ability to reach out to your network to fill spots on the trip.

The enthusiasm to work on advertising and marketing for your project

The desire to deliver Expedition tools for the trip itself - talks,

How to Start

It starts with you, with your vision! It could be as simple as getting involved in ocean plastic cleanups, trawling and documenting waste collection for data analysis. It could be bringing together all all female yacht crew to try your hand at sailing the

From Us

We offer you an experience of a life time aboard our Challenge 72 sailing vessel Sea Dragon. A research vessel with lab space, dissecting microscopes, dive gear, ROV's and surface net trawling gear. She has a crew capacity of 14 and is capable of 10knots

We provide highly experienced and qualified crew; 1 skipper, 1 mate and a deckhand.

We provide remote Medical offshore support.

We provide administrative support for your trip and potential guests.

We provide extensive knowledge and assistance in making your trip happen.

Give it Purpose

It could be you want to highlight unseen pollution in our oceans and seas, through film, photography or educational trips. It might be that you want to empower people to use our waters sustainably in pursuit of leisure activities.

Join Us. Lead. Inspire.

It might be marine or conservational scientific research. Or highlighting the lack of diversity in gender roles in both STEM professions, exploration and sports events.

Trip Practicalities.

We can accommodate many varieties of trip length, our most popular are 6 night 7 day trips, but we do and have accommodated everything from 3 night 4 days up to multiple month expeditions

Arrivals and Departures

We usually have everyone arriving the afternoon before setting sail. And then dropping anchor at the finish, the day before everyone leaves

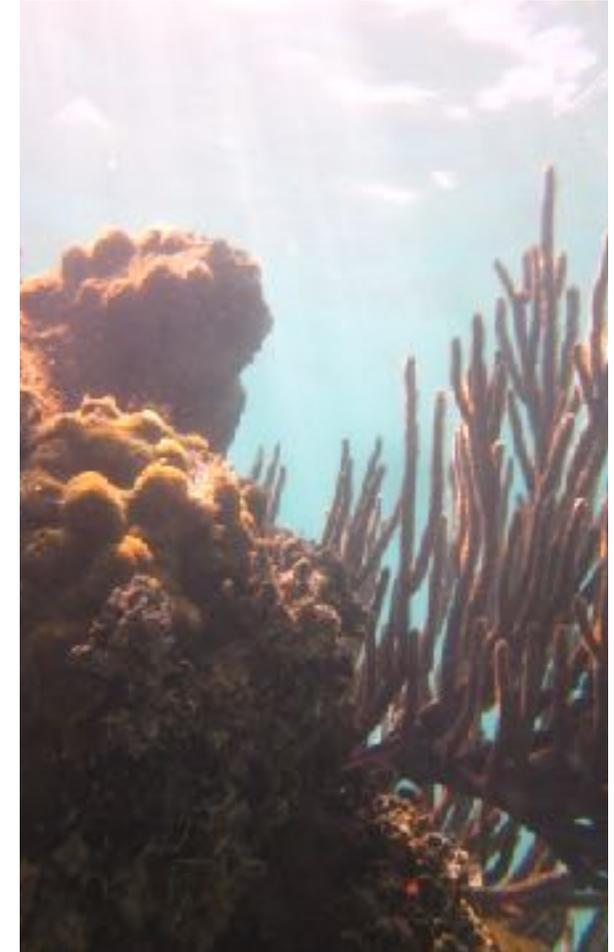

Trip Location

If you have a specific location in mind, we will endeavour to accommodate it. If not, you can see where the boat will be over the next year and take on any of the trips without a leader.

Consolidating Trip

Once you have your mission dates and locations, we can connect you with our skipper and first mate to see what might work and to help initialise your trip.

Then its just about filling those spots on the trip! Reach out to your networks to get the word out. You really need a full boat of 10 confirmed to make a trip work. Utilising advertising and editorial options, make finding like minded people easier, as does using social media networks. We will support you in all of this as much as possible.

Cost of Hiring Sea Dragon

The cost of running Sea Dragon is \$4000 per day (well actually per night (ie 6 days, 5 nights = \$20k)

This Includes

Everything to run the boat.

That is a fully qualified Skipper, Mate and Deckhand crew.

Full offshore medical support.

All Food, and bedding

Full use of research and dive equipment aboard Sea Dragon.

Satellite communications

It does not include guest crew flights, transfers to and from Sea Dragon, personal insurance, your expenses and fee.

So \$4000 per day, needs to be multiplied by number of days, then include your fee (if adding one). This total; (cost per day+number of days+your fee) is then divide by 10 (based on 10 guest crew) for the cost per person.

Trip Itinerary

Its in the Planning;

If you already have an idea as to the itinerary you want to keep.. thats great, discuss the details with our Skipper and first mate, best times to do your sessions, activities, sail and have some leisure time.

Once this is done, then they worry about all the details.

If you are unsure of an itinerary or need help building an itinerary, have a chat with us or our boat crew, we have a long history in organising these trips, we can help.

Ideally you should be looking at about 2 or 3 'mission' sessions per day. These should last approximately 1.5 -2.0 hours each session, equally spread out during the day. One morning session, one afternoon and possibly one evening session, is a good base. It's good to keep lots of chat time between sailing/snorkelling/exploring activities. It's good to know what sessions you want to do and then play it by ear a little depending on the moment/ mood of the group.

Join Us

If you're still keen to be a mission leader and share your project with the world, then please apply here ([LINK TO WEBSITE form](#)).

Mock Itinerary

Day 1

4pm crew arrive
6pm Domestic Briefing
6:45pm Dinner
7:30pm Welcome mission session

Day 2

9am Safety Briefing
11am Depart
12noon - Lunch
1:30pm - Sailing
3pm - *Session*
6pm - Dinner
- photo of the day
6:30pm *Session*

Day 3

11 am - Activities
12noon - lunch
1pm - Sailing
3pm - *session*
6pm dinner

Day 4

10pm *session*
11 pm - Activities
12noon - Lunch
1:30 - Sailing
3pm - *session*

Day 5

7am - hook up /Clear customs
11am - Boat Morning session -
12noon - lunch
1pm - Activities
6pm - dinner/BBQ
6:30 - Session - tie everything together / beers

Day 6

10pm *session*
11pm - Announce Yes Lists
12pm - crew depart
